Sohail Basha G

Hyderabad LinkedIn GitHub

SKILLS

Programming & Databases
Python, PySpark, SQL, Spark SQL

Cloud Platforms & Azure Services
Azure Data Factory (ADF), Azure Databricks, Azure Data Lake, Azure Data Lake Storage Gen2 (ADLS Gen2), Azure Synapse Analytics, Azure Logic Apps

Machine Learning
Supervised & Unsupervised Learning, Logistic Regression, Linear Regression, Decision Trees, Random Forest, SVM, Naive Bayes, KNN, Model Evaluation, ML Pipelines

Data Analysis & Visualization
Pandas, NumPy, Matplotlib, Seaborn, Power BI (DAX, Power Query), Advanced Excel

Data Engineering & ETL
ETL Pipeline Design & Development, Medallion Architecture (Bronze, Silver, Gold), Incremental & Batch Load Strategies, Job Orchestration & Scheduling, Data Cleansing & Transformation, Data Lake & Data Warehouse Implementation

Workflow & Orchestration Tools
Apache Airflow, Azure Data Factory Triggers & Pipelines

PROFESSIONAL EXPERIENCE

Associate
05/2024 – 06/2025

Wipro Limited
Hyderabad

- Worked in **Google Maps Lanes & Automation domain**
- Performed **lane-level data mapping and validation** using Calypso and Data Compute
- Executed **QA & QC** to identify lane count, direction, and turn restriction issues
- Validated **automation outputs** and flagged mismatches against ground truth
- Conducted **root cause analysis** and resolved mapping discrepancies
- Ensured adherence to **Google Maps lane-level quality guidelines**

PROJECTS

Cancer Prediction System Using Machine Learning Pipeline
- Built an ML pipeline using **569 patient records and 30 clinical features** for cancer diagnosis.
- Applied preprocessing and trained **2 classification models** (Logistic Regression, Random Forest) on **569 patient records**.
- Generated reliable predictions using standardized pipelines and model serialization.

Library Management System Using SQL
- Architected a relational database with **8 normalized tables** to manage books, authors, borrowers, and transactions.
- Maintained **1,000+ book records and 500+ borrower entries** with enforced referential integrity.
- Authored **20+ complex SQL queries** using JOINs, subqueries, and aggregation for operational reporting.
- Automated book issue, return, and availability tracking through SQL-based workflows.
- Reduced manual record-keeping effort by **~70%** through database automation.

Customer Churn Analysis using Power BI
- Analyzed churn behavior of **7,032 telecom customers** using demographic, tenure, and billing data.
- Identified **26.6% churn rate** and flagged **1,994 high-risk customers** using rule-based segmentation.
- Quantified churn impact, identifying **139K revenue loss** and **47.8K potential savings**.

Sales Data ETL Pipeline
- **Designed and developed** an end-to-end ETL pipeline using **Programming** to process **20K+ sales records**.
- **Prepared datasets in Azure Data Lake (ADLS Gen2) for analytics workflows.**.
- Refined and structured data in **Azure Databricks** using **Medallion Architecture**.
- Loaded analytics-ready data into **Azure Synapse Analytics**, improving query performance by **40%**.

EDUCATION

Bachelor of Mechanical Engineering
06/2019 – 07/2023

G Pulla Reddy Engineering College
Kurnool, India
