Bhuvana Mandli

Python Developer | Data Scientist

bhuvanam@gmail.com | 9988776655 | Hyderabad, India

SUMMARY

Python Backend Engineer with 2.5+ years of experience developing scalable web applications and AI-powered solutions. Skilled in backend optimization, database performance tuning, and integrating LLMs, OCR, and Computer Vision technologies.

EXPERIENCE

Software Engineer | TCS *06/2025 – 10/2025 | Hyderabad, India*

Junior Software Engineer | Python & Django Developer | XYZ *12/2022 – 05/2025 | Hyderabad, India*

EDUCATION

- **Bachelor of Technology in Computer Science Engineering** | Siddhartha Institute of Technology and Science (GPA: 7.9)
  07/2018 – 05/2022 | Hyderabad, India

SKILLS

- **Languages & Web:** Python, SQL, REST APIs, HTML/CSS
- **Frameworks & Databases:** Django, React, MongoDB, MySQL, SQLite
- **AI & Machine Learning:** TensorFlow, Keras, YOLO, LLM Integration (OpenAI API, LangChain)
- **Libraries:** Pandas, NumPy, Scikit-learn, OpenCV, SciPy, Matplotlib, Seaborn, Mediapipe, pdfplumber
- **Tools & Infrastructure:** Git, Huey, Redis, Power BI, Linux, Windows

PROJECTS

LogiAssist AI - Powered Logistics Support Chatbot

- Built an AI chatbot using Streamlit, LangChain, and OpenAI GPT-4o-mini to handle order tracking, cancellations, and returns.
- Implemented email-based user sessions, conversation memory, and order history integration via JSON data.

Grammar Error Detection

- Enhanced a word-level grammar error detection system using DistilBERT token classification to identify text errors.
- Built an NLP preprocessing pipeline and attained 90% word-level accuracy on test datasets.

Brain MRI Tumor Detection

- Developed a brain tumor classification system using VGG16 transfer learning, TensorFlow/Keras, and image augmentation.
- Integrated YOLO and OpenCV for real-time video detection and prediction visualization.

Road Accident Severity Prediction

- Preprocessed 300K+ UK road accident records and resolved severe class imbalance using SMOTE and class-weighting.
- Trained an Artificial Neural Network (TensorFlow/Keras) optimized via Optuna to reach a macro F1-score of ~0.61.

Swiggy Delivery Time Prediction

- Cleaned and engineered features from raw delivery data using Pandas, NumPy, and Scikit-learn Pipelines.
- Trained and tuned an XGBoost regressor using Optuna ($R^2 = 0.82$) and deployed a live web app on Streamlit Cloud.

CERTIFICATIONS & AWARDS

- **Certifications:** Data Science & Data Analytics, Machine Learning, Power BI(Innomatics), Python FSD (Internshala, QEdge).
- **Awards:** Winzala Hackers Fest | Cyber Security Event - SITS.
- **Languages:** English, Hindi, Telugu.
