# Virat Kohli

Data Scientist Aspirant | Machine Learning - SQL - Power BI - Generative AI

## Summary

Data Science aspirant with hands-on project experience in Python, SQL, Machine Learning, Deep Learning, Power BI, and Generative AI (LLMs, RAG, Agentic AI). Skilled in exploratory data analysis, statistical modeling, predictive model building, and data visualization. Experience building end-to-end machine learning projects including regression models, recommendation systems, and RAG-based AI applications.

## Education

**Data Science** 09/2025 – Present
**Innomatics Research Labs** Hyderabad ,India
Coursework: Python, Statistics, Data Analysis, SQL, Power BI, Agentic AI.

**Anurag University** 2023 – 2025
**Master of Computer Applications(MCA)** Ghatkesar Rd,Venkataput, Hyderabad 500088
Hands-on with Python, SQL, Data Structures & Web Technologies. Capstone: Student Performance Prediction Model (Django, scikit-learn, Random Forest, K-Means).

B.Sc . (MPCS), Palamuru University — CGPA 7.13 (2019–2022) | Intermediate (MPC), CV. Raman Jr. College — CGPA 6.3 (2017–2019) | SSC, Radiant High School — CGPA 7.0 (2017)

## Skills

**PYTHON:**
- Anaconda, Jupyter/Colab Notebook, arrays, NumPy, data manipulation, Pandas.

**Web Scraping:**
- Data extraction using BeautifulSoup and Requests; structured & semi-structured web data.

**Advanced Statistics:**
- Descriptive statistics, probability distributions, data gathering, inferential statistics

**Machine Learning:**
- Regression, classification, Random Forest, K-Means clustering, recommendation systems

**Generative AI:**
- LLM-based applications, Agentic AI, Retrieval-Augmented Generation (RAG), prompt-driven Q&A.

**EDA:**
- Data cleaning, missing value & outlier treatment, univariate/bivariate/multivariate analysis, insight storytelling

**Power BI:**
- Workflow, visualization, Power Query, Power Pivot, DAX, RLS, drill-through, visual interactions

**Databases:**
- SQL / MySQL: CRUD operations, joins, subqueries, constraints, aggregations.

**Deep Learning:**
- Artificial Neural Networks (ANN), Recurrent Neural Networks (RNN)

## Projects

**1. Swiggy Delivery Time Prediction:** (Python, Scikit-learn, Regression, EDA)
- Built a regression model to predict delivery time using distance, traffic, weather, and order-type features.
- Engineered features, handled outliers/missing values, and benchmarked multiple regression algorithms for the best-performing model.

**2. Netflix Movies & Web Series Recommendation System:** (Python, Scikit-learn, Content-Based Filtering)
- Built a recommendation engine suggesting titles based on content similarity (genre, cast, description) using text vectorization and similarity scoring.

**3. AI-Powered Resume Screening System** (Python, LLMs, RAG, Vector Search)
- Built an LLM-based resume screening tool that ranks candidates against job criteria using natural-language matching. • Incorporated a RAG-based enterprise workspace module enabling natural-language Q&A over enterprise documents, grounding responses in source data.

## Certificates

- Python, Data Analysis
- Data Science.
- PG Diploma in Computer Applications (Server Infosys)

## Languages

- English
- Telugu
- Hindi
