SUMMARY

Data science graduate with expertise in SQL, Power BI, Python, data visualization, and Machine Learning. Skilled in data cleaning, exploratory data analysis (EDA), dashboard development, and predictive modeling. Passionate about leveraging data to solve complex problems and improve business performance.

SKILLS

Programming & Tools
Python, NumPy, Pandas, Matplotlib, Jupyter Notebook, Google Colab

Data & Databases
SQL (Joins, Subqueries, CTEs, Window Functions, Aggregate Functions), SQLite, Data Cleaning, Data Transformation, Data Modeling

Tools and Libraries
OpenCV (Image Processing & Computer Vision), MediaPipe, NumPy, Matplotlib

Machine Learning
Supervised & Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation (MSE, RMSE, R^2), Cross-Validation, Hyperparameter Tuning, Model Selection

Business Intelligence & Power BI
Dashboard Development, Data Visualization, DAX, Data Modeling, Power Query (ETL)

PROJECTS

Virtual Gesture Calculator | Computer Vision
- Developed a gesture-controlled virtual calculator using OpenCV and MediaPipe
- Implemented real-time hand tracking and gesture recognition
- Designed a touchless system to perform arithmetic operations
- Applied image processing techniques for accurate detection

Swiggy Delivery Time Prediction | Machine Learning
- Performed data cleaning, feature engineering, and EDA
- Trained models like Linear Regression, Random Forest, and XGBoost
- Improved performance using hyperparameter tuning and cross-validation

Library Database Analysis | SQL
- Designed a SQL-based library database and performed data analysis
- Analyzed borrowing patterns, overdue loans, and demand trends
- Used JOINs, aggregations, and subqueries for insights

IMDb Movie Sales Analysis | Power Bi
- Cleaned and transformed movie dataset to build an interactive Power BI dashboard
- Created visualizations to analyze trends, top genres, revenue, and ratings
- Developed DAX measures for KPIs such as total revenue and average rating
- Derived insights on top-performing genres and profitable years

Laptop Price & Feature Analysis | EDA (Python)
- Collected and cleaned laptop dataset for analysis.
- Performed exploratory data analysis to identify trends in pricing, discounts, and product features.
- Created data visualizations using Pandas, Matplotlib, and Seaborn to derive insights.

EDUCATION

2022 – 2025 Hyderabad
Bachelor of Science in Data Science
Osmania University

CERTIFICATES

- SQL Programming - Innomatics Research Labs
- Machine Learning - Innomatics Research Labs
- Power Bi - Innomatics Research Labs
- Data Analytics - Centum Foundation (HCL Foundation)
