SUMMARY

Computer Science graduate with hands-on project experience building Machine Learning, Deep Learning, Computer Vision, and Generative AI applications. Proven ability to translate theoretical concepts into functional code, develop classification and regression models, and implement NLP and neural-network solutions. Eager to contribute foundational technical skills and a passion for AI innovation.

INTERNSHIP

Industry Oriented Data science Intern - swecha
- Contributed to open-source machine learning and data science repositories, developing and evaluating predictive models like the Iris flower classification pipeline to solve data-driven challenges.

SKILLS

Programming
Python, NumPy, Pandas, OOP, File Handling

Power BI
Power BI Fundamentals, Power Query, DAX, Data Modeling, Data Visualization

Gen AI & NLP
Generative AI, LLMs, Prompt Engineering, OpenAI, Gemini, Groq, LangChain, Hugging Face Transformers, DistilBERT, Structured Output (Pydantic)

Deployment & Tools
Streamlit, FastAPI, GitHub, Jupyter Notebook, Pickle Model Serialization

SQL
MySQL, CRUD, DQL, Filtering, Clauses, Keys, Joins, Set Operations, Subqueries, Stored Procedures, Triggers

Machine Learning
Scikit-learn, TensorFlow, Keras, Supervised Learning, Unsupervised Learning, XGBoost, Feature Selection, Cross-Validation, Hyperparameter Tuning, Evaluation metrics, Regularization, Balancing Techniques

Deep Learning & Computer Vision
ANN, CNN, Transfer Learning, Image Classification, Object Detection, OpenCV, Preprocessing, Dropout, Early Stopping, Batch Normalization

PROJECTS

Swiggy Delivery Time Prediction
- **Built a machine learning regression model** to predict food delivery times using order, traffic, and location data.
- **Performed data preprocessing and missing value handling** to improve data quality and prediction performance.
- **Achieved 80% accuracy**, supporting efficient delivery planning and logistics optimization.

Student Health Risk Prediction
- **Developed an ANN model** to classify student health risk levels using multi-variate behavioral data.
- **Improved model performance** using data normalization, Dropout, and Early Stopping techniques, achieving 86% accuracy.
- **Evaluated model performance** using **precision, recall, and F1-score** to ensure reliable classification.

Crimewatch AI: Intelligent CCTV Crime Activity Detection
- **Developed a CNN-based model** to detect and classify activities from CCTV video footage.
- **Preprocessed video frames** using resizing, normalization, and sequence extraction to improve model learning.
- **Achieved automated activity classification** to support real-time CCTV surveillance and suspicious activity detection.

Bank Customer Complaint Classification
- **Built an NLP pipeline** using a DistilBERT tokenizer and three Keras deep-learning models to classify customer complaints into Product , Issue, and Sub-issue categories.

- **Implemented an end-to-end inference pipeline:** tokenization, sequence padding, model prediction, and label decoding via saved LabelEncoders.
- **Deployed as an interactive Streamlit application** for real-time complaint classification

AI-Powered Interview Coach
- **Built a Generative AI mock-interview application** using LangChain and a Groq-hosted LLM, generating tailored interview questions from an uploaded resume (PyPDFLoader).
- **Supported selectable difficulty** (Easy/Intermediate/Advanced) and interview type (Technical/HR/Behavioural) to customize each question.
- **Implemented structured LLM output** (Pydantic schema) to auto-score candidate answers and generate strengths, improvements, and model answers.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2021 – 2025
Nalla Malla Reddy Engineering College Narapally, Medchal

CERTIFICATIONS

Data Science Internship Certification from Swecha

Certificate of Completion – Python Essentials 1 from Cisco

Certificate of Completion – Power BI Module

Certificate of Completion – Machine Learning Module

Certificate of Completion – SQL Module

COMPETITIONS

- student health risk prediction
- Hr Analytics
- Titantic survival prediction
