Aspiring Data Analyst
+91 9951287089 ◇ Hyderabad, India

PROFESSIONAL SUMMARY

Aspiring Data Analyst with expertise in SQL, Python, and Business Intelligence tools. Experienced in data analysis, reporting, dashboard development, and statistical analysis using structured datasets to support data-driven business decisions.

EDUCATION

Malla Reddy Institution of Technology and Science Nov 2021 – Jul 2025
Bachelor of Technology in Computer Science and Engineering (AI&ML)

TECHNICAL SKILLS

Programming	Python, SQL (JOINs, Subqueries, GROUP BY, Aggregations)
Database	MySQL
Business Intelligence	Power BI, Dashboard Development, KPI Reporting
Data Analysis	Data Cleaning, EDA, Statistical Analysis, Trend Analysis
Tools	Excel, Git, GitHub

PROJECTS

Global Energy Consumption Analysis using SQL 2026

- Analyzed 6 relational datasets (10,000+ records) using MySQL with JOINs and subqueries.
- Determined China contributes 32% of global emissions through emission share analysis.
- Calculated emission-to-GDP and consumption-to-GDP ratios to evaluate economic efficiency.
- Generated analytical insights linking GDP growth, energy consumption, and carbon emissions.

Analyzing Factors Influencing Worldwide Box Office Success (IMDb) 2026

- Analyzed IMDb dataset with 8+ features including rating, metascore, runtime, and gross.
- Found PG-13 films achieving higher average worldwide revenue.
- Established positive correlation between IMDb rating and box-office gross.
- Conducted 2 hypothesis tests ($p < 0.05$), rejecting H_0 and confirming significant revenue drivers.

Customer Churn Analysis using Power BI 2025

- Conducted data analysis on 7,043 customer records to evaluate churn drivers.
- Developed interactive Power BI dashboards with 12+ KPIs for business reporting.
- Revealed 26.5% churn rate and proposed data-driven retention strategies.

Crop Yield Prediction Using Machine Learning 2025

- Processed 5,000+ agricultural records and performed feature engineering.
- Built Random Forest model achieving R^2=0.87 and MAE=3.4 tons/ha.
- Applied predictive analytics to simulate 22% yield improvement.
