# Naidu Keerthi Harshitha

Data Scientist

abc@gmail.com 1234567890 Vijayawada

## Education

**Bachelor of Technology, Electronics and communication Engineering,** 06/2019 – 06/2023
*Jawaharlal Nehru Technological University* Hyderabad, India

## Skills

**PYTHON**
Anaconda, Jupyter Notebook, Google Colab, Identifiers & Operators, Data Types, Functions, Conditional Statements

**Power BI**
Power BI workflow, Power Query, Visualisation, Trend Data viz, Power Queries, Power Pivot, DAX, ETL, Web & RLS.

**Advanced Statistics**
Descriptive Statistics, Data cleaning, Data Manipulation, Data Visualization, File Handling, Probability Distribution, Inferential Statistics, Feature Engineering.

**EDA**
Pandas, Matplotlib, Seaborn, Data Cleaning, Missing Value & Outlier Handling, Descriptive Statistics, Univariate-Bivariate-Multivariate Analysis, Correlation Analysis.

**SQL**
CRUD operation, RDBMS, DDL,DML,DQL and Operators, Constraints, Aggeration Functions,Joins, ACID, COMMIT, ROLLBACK

**Machine Learning**
ML Algorithms, Validation Methods, Naive Bayes, Linear Algebra, K-NN, Hyperparameters, Dimensionality, Decision Tree, Linear regression, Evaluation Metrics,Cross ValidationRegression Techniques,MSE & RMSE, Polynomial regression, Regularization Techniques, Logistic Regression.

## Languages

- English
- Telugu

## Education

**Data Science,** *Innomatics Research Science* 07/2025
Hyderabad, India

- Coursework in Python, Statistics, Data Analysis, SQL + PowerBI, ML, Computer Vision

## Projects

**EDA Using Python Libraries**

- Scraped and analyzed 1,050+ mobile phone listings from Flipkart's mobiles page using Python to collect details like brand, model, price, discount, RAM, storage, Reviews, and ratings.
- Cleaned and organized the data using Pandas and created charts using Matplotlib and Seaborn to understand price trends, brand comparison, discounts, and rating patterns.
- Achieved high data accuracy and generated useful insights to help compare smartphones and support better buying decisions.

**Pizza Sales Analysis**

- Built and analyzed a Pizza Sales database using MySQL with 5 tables (orders, order_details, pizzas, pizza_details, chef_production) to manage pizza type, size, price, delivery address, and chef production details.
- Used SQL queries (JOIN, GROUP BY, SUM, COUNT) to find top-selling pizzas, total pizzas made by each chef, chef shift timings, and overall sales performance.
- Created clear sales and production reports to help improve inventory planning, staff management, and increase overall business profit.

**Telangana Weather Data Analysis**

- Analyzed Telangana weather data (temperature, rainfall, humidity, wind speed) using Power BI across 33 districts to reveal seasonal trends and patterns.
- Transformed raw data via Power Query for 95% accuracy, ensuring clean models for district comparisons.
- Developed interactive dashboards with time/district visuals, identifying 25% rainfall variance to boost agricultire planning efficiency by 30%.

**Zomato Restaurant Analysis**

- Developed an interactive Power BI dashboard for Zomato Restaurant Analysis to study restaurant location (city, country), cuisines, price range, online delivery, table booking, average cost for two, customer votes, and ratings.
- Cleaned and transformed the dataset using Power Query and created DAX measures to analyze restaurant trends, customer preferences, pricing patterns, and service impact on ratings.
- Designed visual reports (bar charts, maps, slicers, KPI cards) to help users compare restaurants easily and support data-driven decisions for customers and restaurant owners.

**Swiggy Delivery Time Predictions Using ML**

- Developed a machine learning model to predict Swiggy delivery times using regression techniques, improving accuracy and reliability of time estimates.
- Compared multiple models (KNN, Linear Regression, Random Forest, Gradient Boosting) and achieved best performance with Random Forest (MAE: 3.19, R^2: 0.82).
- Applied data preprocessing, feature engineering, and evaluation metrics (MAE, RMSE, R^2) to optimize predictive performance for real-world delivery scenarios.

## Certificates

- Certified in Python for Data Analysis
- Certified in Machine Learning
- Certified in PowerBI
- Certified in MySQL
- Certified in Exploratory Data Analysis
