Paid Internship

Intern -MIS Executive – HR Team, *Buzzworks Pvt Ltd* 13/08/2024 – 06/2025
Bengaluru

- Completed **11 months of internship experience as an MIS Executive (HR Team)**, managing recruitment, employee, and performance-related datasets with high accuracy.
- Created and automated **MIS reports and dashboards** using advanced MS Excel (pivot tables, formulas, charts) for weekly and monthly business reviews.
- Performed **data cleaning, validation, and consolidation** to ensure data consistency and reliability for decision-making.
- Analyzed **recruitment and workforce trends** and collaborated with HR stakeholders to deliver actionable insights that improved reporting efficiency and reduced manual effort.

HR Workforce Analytics & MIS Reporting Project

- Built and maintained HR MIS reports by collecting, cleaning, and consolidating recruitment, employee, and performance datasets.
- Designed automated dashboards and reports using **MS Excel** (Pivot Tables, formulas, charts) for weekly and monthly reviews.
- Analyzed recruitment funnel, headcount, and workforce trends to support data-driven management decisions.
- Improved reporting accuracy and reduced manual effort through automation and structured data validation.

Academic Background

MBA in Human Resource Management, 2024
Jawaharlal Nehru Technological University (JNTU-A) Anantapur

- MBA in Human Resource Management from Jawaharlal Nehru Technological University (JNTU-A), Anantapur from 2024.

BBM, *Dr. Jyothirmayi Degree College* Adoni, Rayalaseema University, Kurnool

- BBM from Dr. Jyothirmayi Degree College in Adoni, Rayalaseema University, Kurnool.

Languages Known

- English
- Telugu
- Kanada
- Hinde

Hobbies

- Reading books and Browsing
- Traveling and Cooking Food

Skills

PYTHON
Python: Anaconda, Jupyter Notebook, Colab Notebook, syntax, Identifiers & Operators, Array, Numpy, Data Manipulation, Pandas

SQL + Power BI
MYSQL, NoSQL, CRUD operation, RDBMS, Data Exploration and Data Filtering, DQL

Deep Learning
AI, MLAND DL, Biological Neuron, Google Colab, Tensorflow, Neural Network, Forward & Backward Propagation, Optimizers, MLP

Power BI
Power BI workflow, Visualisation, Trend Data viz, Power Queries, Power Pivot, DAX, DA Expression, Web & RLS, Visual Interactions, Drill Through.

Natural Language processing
NLTK, spacy, BOW, TF-IDF, Glove, Fast text, RNNs, LSTMs, Auto Encoders,BERT

MIS Executive
Prepared and maintained daily, weekly, and monthly MIS reports using Excel, SQL, and Power BI to support management decision-making.

Advanced Statistics
Descriptive Statistics, Probability Distribution, Data Gathering Techniques, Inferential Statistics.

CNN & Computer Vision
Open CV, Convolutional, TransferLearing, Object Detection, YOLO.

Machine Learning
Supervised, Unsupervised, ML Algorithms, Validation Methods, Naive Bayes, Linear Algebra, K-NN, Hyperparameters, Dimensionality, Decision Tree, Linear regression, Evaluation Metrics, Regression Techniques, Q-Q Plot, MSE & RMSE, Polynomial regression, Regularization Techniques, Logistic Regression, Hierarchical Clustering.

GEN AI
Large Language Models, OpenAI, DALL-E, GPT-3/GPT-4, Gemini, LLaMA, LangChain

Project Work

Exploratory Data Analysis (EDA) Using Python

Performed Exploratory Data Analysis using **NumPy, Pandas, BeautifulSoup, Matplotlib, and Power BI** to generate sports and sales insights.

- Extracted and analyzed **3,000+ records** using Python for web scraping, data collection, cleaning, and preprocessing.
- Conducted a detailed performance analysis of **Virat Kohli** across formats:
- ODI: **13,848 runs**
- Test: **8,848 runs**
- T20: **4,188 runs**
- Analyzed **Adidas sales data** at regional and city levels using Power BI dashboards and visualizations.
- Achieved **96% accuracy**, enabling actionable insights for customer and business decision-making.

Churn Data Prediction in the Telecommunication Industry

- Analyzed **570,000+ Amazon customer review text files** using Python and the **glob** module for large-scale data processing.
- Applied **Natural Language Processing (NLP)** techniques combined with machine learning algorithms for text preprocessing and sentiment classification.
- Implemented scalable models to predict **sentiment polarity and star ratings** from customer reviews.
- Achieved **86% model accuracy**, delivering actionable insights for customer experience and business decisions.

Sentiment Analysis from Amazon Reviews

- Analyzed **570,000+ Amazon customer review text files** using Python and the **glob** module for large-scale data processing.
- Applied **Natural Language Processing (NLP)** techniques combined with machine learning algorithms for text preprocessing and sentiment classification.
- Implemented scalable models to predict **sentiment polarity and star ratings** from customer reviews.
- Achieved **86% model accuracy**, delivering actionable insights for customer experience and business decisions.

Instagram Clone Database Design and Implementation (MySQL)

- Designed and implemented a **relational database schema** for an Instagram-like platform, managing data for **5,000+ user accounts**.
- Developed and optimized **MySQL queries** using joins and subqueries to extract user activity, engagement, and interaction metrics.
- Analyzed posts to identify **highest/lowest comment counts, most-liked content, and top-performing hashtags**, and detected **320 fake accounts within 24 hours**.
- Created and maintained interconnected tables for **users, posts, comments, likes, and hashtags**, improving data integrity and enabling analytics that boosted platform optimization by **70%**.

Smart Recipe Recommendation System

- Developed an AI-powered recipe recommendation system using Streamlit and Gemini AI.
- Integrated LangChain for intelligent food query processing and recipe generation.
- Implemented nutrition advice, cooking steps, and ingredient extraction features.
- Designed a responsive and attractive UI using advanced CSS styling.
- Added JSON parsing and exception handling for smooth application performance.

TuneMind AI Chatbot

- Built an AI chatbot using Streamlit, LangChain, and Gemini AI.
- Implemented multiple conversation modes like Creative Lyricist and Productivity Coach.
- Designed a modern neon-themed responsive user interface with custom styling.
- Added session-based chat history and real-time conversational workflow.
- Integrated adjustable creativity controls for personalized AI responses.

Exploratory Data Analysis of Factors Affecting Used Product Prices in the Resale Market (eBay)

- Performed Exploratory Data Analysis (EDA) on eBay used iPhone 13 resale market data to identify factors affecting product pricing.
- Analyzed seller reputation, product condition, shipping strategy, and listing format using statistical and visualization techniques.
- Applied data cleaning, feature engineering, currency normalization, and outlier removal using the IQR method.
- Generated business insights showing the impact of seller ratings, free shipping, and auction formats on product sales and pricing.
- Created visualizations and correlation analysis to support data-driven recommendations for buyers and sellers.

AI Car Screen & Activity Control Using Hand Gestures

- Developed an AI-based hand gesture recognition system to control car screen activities and infotainment functions.
- Implemented computer vision techniques for real-time gesture detection and activity control.
- Designed touchless interaction features to improve driver safety and user experience inside vehicles.
- Integrated gesture-based commands for media control, navigation, and screen operations.
- Utilized AI and image processing concepts to enable accurate and efficient hand tracking.
