Summary

Computer Science Engineering graduate with hands-on knowledge of **Artificial Intelligence, Machine Learning, Deep Learning, Python, SQL, and Data Analytics**. Experienced in **data preprocessing, EDA, feature engineering, model development, evaluation, and deployment** through academic and practical projects. Worked with **Scikit-learn, TensorFlow, Pandas, NumPy, Power BI, and Streamlit**, with practical exposure to building end-to-end ML and ANN-based solutions for real-world datasets.

Education

B.tech -Computer Science Engineering, *Ace Engineering College* 09/2023 – 2026
Hyderabad, India

Skills

Programming:
- **Python:** Strong understanding of Python programming fundamentals, including variables, data types, operators, conditional statements, loops, functions, modules, and exception handling.
- **Object-Oriented Programming:** Familiar with **classes, objects, inheritance, polymorphism, encapsulation, and abstraction** and their application in developing structured and reusable code.

Advanced Statistics
- Descriptive Statistics, Probability Distribution, Data Gathering

Techniques, Inferential Statistics.

Deep Learning
- Neural Network, Forward & Backward Propagation,MLP,Optimizers, Activation Functions,Tensorflow,keras,Hyper parameter Tuning.

Machine Learning
- Supervised, Unsupervised, ML Algorithms, Validation Methods, Naive Bayes, Linear Algebra, K-NN, Hyperparameters, Dimensionality, Decision Tree, Linear regression, Evaluation Metrics, Regression Techniques,MSE & RMSE, Polynomial regression, Regularization Techniques, Logistic Regression,Classification,Evaluation metrics, Hierarchical Clustering.

Projects

1.Swiggy Delivery Time Prediction (Machine Learning)
- Developed a machine learning model to predict Swiggy food delivery time using historical order and delivery data.
- Cleaned and preprocessed the dataset by handling missing values, encoding categorical features, and scaling numerical variables.
- Engineered meaningful features to improve model performance and prediction accuracy
- Trained and evaluated multiple regression algorithms including **Linear Regression, Random Forest Regressor,SVR and XGBoost**
- Optimized model performance using hyperparameter tuning and cross-validation.
- Evaluated the models using **MAE, RMSE, and R^2 Score**, selecting the best-performing model based on prediction accuracy.

2.Hotel Booking Cancellation Prediction
- Developed an **ANN-based machine learning model** to predict whether a hotel booking would be cancelled based on booking, guest, stay, and reservation-related features.
- Performed **data cleaning, exploratory data analysis (EDA), feature engineering, categorical encoding, and numerical feature scaling** to prepare the dataset.
- Applied **SMOTE** to handle class imbalance and improve the model's ability to identify cancellation cases.
- Built an end-to-end **preprocessing and prediction pipeline** and deployed the model using **Streamlit** for interactive cancellation prediction.

TRAINING / CERTIFICATIONS

Data Analyst Training – Innomatics Research Labs 08/2025 – Present
- Hands-on training in Python, SQL, Statistics, and Data Analysis
- Completed projects on SQL database design and Power BI dashboards
- Certification projects on SQL database design and Power BI dashboards
- Certification in Python Programming – Innomatics Research Labs
- Certification in Exploratory Data Analysis – Innomatics Research Labs

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Telugu
