Education

08/2025 – Present
Hyderabad

Data Science
Innomatics Research Labs
- Course work in Python, Statistics, Data Analysis, SQL + Power BI, Machine Learning

08/2016 – 09/2020
Warangal

Bachelor of Technology - Computer Science Engineering
University College of Engineering and Technology For Women

Skills

PYTHON
Anaconda, Jupyter Notebook, Colab Notebook, syntax, Identifiers & Operators, Array, Numpy, Pandas

Machine Learning
Supervised, Unsupervised, ML Algorithms, Validation Methods, Naive Bayes, Linear Algebra, K-NN, Hyperparameters, Dimensionality, Decision Tree, Linear regression, Evaluation Metrics, Regression Techniques, Q-Q Plot, MSE & RMSE, Polynomial regression, Regularization.

Power BI
Power BI workflow, Visualisation, Trend Data viz, Power Queries, Power Pivot, DAX, DA Expression, Web & RLS, Visual Interactions, Drill Through.

SQL + Power BI
MYSQL, NoSQL, CRUD operation, RDBMS, Data Exploration and Data Filtering, DQL and Operators, Clauses, Joins, ACID, COMMIT, ROLLBACK.

Advanced Statistics
Descriptive Statistics, Probability Distribution, Data Gathering Techniques, Inferential Statistics.

Deep Learning
AI, MLAND DL, Biological Neuron, Google Colab, Tensorflow, Neural Network, Forward & Backward Propagation, Optimizers, MLP

Languages

- English
- Hindi
- Telugu

Projects

Automated Financial Performance Analysis using Power BI
- Utilized a Kaggle Financial Statement dataset (6 Excel files, ~10,000 records) covering Income Statement, Balance Sheet, and Cash Flow data with 20-30 key financial metrics.
- Performed data cleaning, reshaping, and unpivoting using Power Query (M Language) to standardize and prepare data for analysis.
- Designed a structured data model with defined relationships to enable efficient financial analysis and Power BI reporting.

Automated Book Circulation and Library Record System using MYSQL
- Developed a Library Management System using MySQL to automate book tracking, borrower management, and loan transactions.
- Designed 7 normalized relational tables (books, authors, copies, loans, borrowers, branches, publishers) with primary and foreign key constraints.
- Implemented efficient transaction handling to manage book issue, return, and overdue records accurately.
- Enabled advanced search and reporting for book availability, borrower activity, and overdue analysis.

- Built a scalable and structured data model to support smooth library operations and future expansion.

Exploratory and Statistical Analysis of Pricing, Discounts, and Customer Perception in Mamaearth Products

- Analyzed 800+ Mamaearth products (11 features) using Python, Pandas, and Selenium to study pricing, discounts, and customer perception.
- Performed EDA showing ~70% products priced 300-600 and ~85-90% ratings between 4.6-5.0, indicating strong mid-premium positioning and high customer satisfaction.
- Applied statistical tests (Spearman correlation = 0.123, ANOVA $p < 0.05$) revealing price has weak impact on ratings, but ratings significantly vary across categories.
- Identified key insights: combo products (corr $\approx$ 0.2) and >=3 claims lead to stable ~4.8+ ratings, enabling data-driven pricing and marketing strategies.

FoodTech - Delivery Time Prediction on Swiggy

- Developed a machine learning regression model for ETA prediction using operational and environmental features, achieving R2 $\approx$ 0.81 with low RMSE (~3-4 minutes), ensuring high prediction accuracy.
- Performed advanced EDA & statistical analysis, identifying key patterns: delivery time concentrated at 15-32 mins, with variability (std $\approx$ 9 mins) and extreme delays up to 54 mins.
- Applied feature engineering & correlation analysis, revealing significant predictors: distance (r $\approx$ 0.31), multiple deliveries (r $\approx$ 0.38), and rider ratings (r $\approx$ -0.35) impacting delivery performance.
- Optimized model using hyperparameter tuning (Optuna) and cross-validation, improving performance (R2: ~0.80 -> ~0.81) with low variance across folds, ensuring strong generalization.

Certificates

- CISCO Certificate in Python Essentials Intermediate Level
- Certificate in Python, Innomatics Research Labs
- Infosys Springboard Certificate in Jupyter with Data Science
- Certificate in MySQL, Innomatics Research Labs
