Vamshi Darshanam

Hyderabad, India linkedin.com/in/vamshi-darshanam-11aa70329 github.com/vamshi05-tech

Education

Bachelor of Science - Mathematic, Statistics and Computer Science, *Ousmania University* 08/2021 – 04/2025
Hyderabad

Core Skills

Python
Anaconda, Jupyter Notebook, Colab Notebook, syntax, Identifiers & Operators,Conditional Statements,Iterative Statements,Functions,oops.

SQL
MySQL, relational databases Data extraction using JOINs, GROUP BY, subqueries Data filtering and aggregation for BI reporting

Advance Statistics
Descriptive Statistics, Probability Distribution, Data Gathering Techniques, Inferential Statistics.

Deep Learning
Artificial Neural Networks (ANN), Activation Functions (ReLU, Sigmoid, Tanh, Softmax),Backpropagation, Optimizers (SGD, Adam), CNN (Convolutional Neural Networks), RNN, LSTM, GRU, Transfer Learning, Regularization (Dropout, BatchNorm)

Power BI
Power BI Desktop & Service Interactive dashboards, KPIs, slicers, filters Data modeling and relationships DAX basics (calculated columns, measures) Trend analysis and business reporting

Exploratory Data Analysis
Data Cleaning, Data Preprocessing, Handling Missing Values, Outlier Detection, Data Transformation, Feature Analysis, Statistical Analysis, Data Visualization, Correlation Analysis, Univariate Analysis, Bivariate Analysis, Multivariate Analysis, Pandas, NumPy

Machine Learning
Unsupervised Learning, Reinforcement Learning (Basics), Regression (Linear, Ridge, Lasso), Classification (Logistic, KNN, SVM), Decision Trees & Random Forest, Gradient Boosting (XGBoost, AdaBoost), Bias-Variance Tradeoff, Overfitting & Underfitting, Cross Validation ,Hyperparameter Tuning (Grid Search CV, Random Search CV)

Projects

Indeed.com Job Market Analysis, *EDA*
Analyzed job posting data to identify in-demand roles, salary trends, and required skills. Performed data cleaning and preprocessing before visualization. Created Power BI visuals to highlight experience-level demand and skill frequency. Supported career and hiring insights through data-driven reporting.

Global EV Sales Dashboard (2010–2024), *Power BI*
Developed an end-to-end Power BI dashboard to analyze global electric vehicle sales trends. Designed KPIs to track year-over-year growth, regional performance, and market leaders. Used slicers and drill-down features to enable interactive exploration by year and region. Delivered insights on EV adoption trends to support strategic decision-making.

Grocery Store Sales Analysis, *SQL*
Built a structured relational database for a grocery store business. Extracted sales, customer, and product insights using optimized SQL queries. Provided datasets suitable for Power BI dashboards and management reporting. Identified top-selling products and revenue trends.
